Projects

MENU-RESTAURANT | HTML, CSS, JAVASCRIPT

🐙 github.com/IS3004

- Led the development of a microservices-based web development resulting in a restaurant website where users can order food as many orders.
- Designed and deployed with HTML, CSS, JavaScript languages
- Very easy to access the restaurant's contact and dishes, its prices and any complaints through online.

PARAKRAM | Kotlin, Firebase Cloud Messaging and Realtime DataBase, MVVM, Coroutines

🐙 github.com/IS3004

- Developed an APP using XML.
- APP is based on score entry regarding sports in Parakram events held in our IIT.
- People can access the score of a sport at any instant of time.
- Implemented real-time scores for 15 different games using Firebase Realtime Database and enhanced user engagement with push notification.
- Created an admin-facing app with MVVM architecture for managing scores and notifications, streamlining operations for event organizers.
